

## Aerospace Fastener's FOD Prevention Policy

Aerospace Fasteners Ltd are a quality driven organisation and maintain a certification to ISO 9001:2015 and AS9120B standards. Our quality manual contains procedures which adhere to the avoidance of FOD Contaminated parts.

This policy applies to where components are assembled, transported, inspected and stored.

- All personnel with access to FOD Sensitive Products/Areas shall be made aware of FOD Prevention.
- Utilize normal "Clean As You Go" routine to provide an organized and professional working environment for personnel.
- Personal items must be stored safely away from working areas.
- Incidents involving foreign objects should be reported to local management and investigated.
- All equipment used in the processing of Products, must be thoroughly inspected before use to ensure they are in proper working condition, and that no foreign object can migrate and/or damage the product.

Should you have any questions or queries regarding Aerospace Fasteners FOD prevention policy, please feel free to contact us immediately as these are standards and policies that we as company hold in very high regard.

Many Thanks

Yours Sincerely

Dean Gendall
