

Aerospace Fastener's Counterfeit Parts & Suspected Unapproved Parts Policy

Aerospace Fasteners Ltd is a quality-driven organization committed to maintaining certification to ISO 9001:2015 and AS9120B standards. Our quality manual includes procedures aimed at the avoidance of counterfeit parts and suspected unapproved parts.

- Aerospace Fasteners Ltd exclusively purchases products from suppliers listed on our approved supplier lists, ensuring adherence to customers' authorized requirements. We do not engage with non-authorized manufacturers or suppliers. Our approved supplier list is regularly updated to maintain accuracy and ensure that all products are authentic and conform to the correct technical specifications.
- All suppliers to Aerospace Fasteners Ltd are required to have processes in place to prevent the inclusion of counterfeit parts and suspected unapproved parts at the point of order. This includes robust verification and quality assurance procedures to ensure product integrity.
- We maintain comprehensive traceability of all products by retaining receiving documentation, including the supplier's Certificate of Conformance. These records are kept for the necessary retention periods to support traceability. Each batch is labelled with batch no's that allow tracing back to its original manufacturer, ensuring full traceability.
- Upon receipt, all products undergo incoming inspection to confirm they are undamaged and meet customer specifications. This step helps identify and mitigate the risk of counterfeit and suspected unapproved parts entering our inventory. Verified products are then securely stored in our warehouse.
- If any product is suspected to be counterfeit or unapproved, we have established processes to withdraw the affected products from distribution and place them in quarantine. Aerospace Fasteners Ltd will collaborate with suppliers and customers to verify the authenticity of any parts in question and take necessary actions, including reporting and investigating the incident as per industry regulations.
- Aerospace Fasteners Ltd ensures that any product identified as counterfeit or unapproved, and determined to be non-conforming, is disposed of in a manner that prevents resale. This is part of our commitment to maintaining the integrity of the supply chain..

We uphold these standards and policies with the highest regard to ensure the safety and reliability of our products. For any inquiries regarding our counterfeit and suspected unapproved parts policy, please contact us immediately. Your safety and satisfaction are our top priorities.

Many Thanks
Yours Sincerely
