

Aerospace Fastener's Ltd Restrictions **of Hazardous Substances (RoHS)**

We would like to thank you for your enquiry with Aerospace Fasteners and our stance towards RoHS regulations.

We as a company are fully aware of Importance of the Rosh Directive (EU) 2015/863 (Amending Annex 2 to directive 2011/65/EU). Aerospace Fasteners are fully committed to protecting life & creating a cleaner and efficient environment.

The RoHS directive is an EU backed aim, specifically targeting the harmful environmental impact of waste electrical equipment, by restricting known dangerous substances. Introduced on the 1st of July 2006, electrical equipment that is either new or is being introduced to the market place and is categorised into a specific category will no longer be allowed to contain the following chemicals above specified limits.

The chemicals are as follows;

- Lead (0,1 %)
- Mercury (0,1 %)
- Cadmium (0,01 %)
- Hexavalent chromium (0,1 %)
- Polybrominated biphenyls (PBB) (0,1 %)
- Polybrominated diphenyl ethers (PBDE) (0,1 %)
- Bis(2-ethylhexyl) phthalate (DEHP) (0,1 %)
- Butyl benzyl phthalate (BBP) (0,1 %)
- Dibutyl phthalate (DBP) (0,1 %)
- Diisobutyl phthalate (DIBP) (0,1 %)

The restriction of DEHP, BBP, DBP and DIBP shall not apply to cables or spare parts for the repair, the reuse, the updating or upgrading of capacity of electrical and electronic equipment. As a stockist for any type of build, be it new or repair we are aware of our responsibility regarding the ROHS directive.

As a fastener company, we would mention that the products that we supply, do not require electricity to function. This would make us except from RoHS restriction as we do not handle such products. However, the importance of such restrictions is followed and understood by Aerospace Fasteners Ltd should any restricted items pass through our facilities.

Should you have any questions, please feel free to contact us at any point.

Many Thanks

Yours Sincerely

Dean Gendall
