

Aerospace Fastener's Counterfeit Parts Policy

Aerospace Fasteners Ltd are a quality driven organisation and maintain a certification to ISO 9001:2015 and AS9120B standards. Our quality manual contains procedures which adhere to the avoidance of counterfeit parts.

- Aerospace Fasteners Ltd only purchases product from suppliers that appear on our approved supplier lists and conform to customers authorized requirements. Aerospace Fasteners Ltd does not purchase from non-authorized manufacturers and suppliers. Our approved supplier list is continually updated to maintain accurate records. This ensures product is authentic and made to correct technical specifications.
- All of Aerospace Fasteners Ltd suppliers are requested to have a counterfeit avoidance process in place at point of order.
- Aerospace Fasteners Ltd maintains traceability of product, retaining receiving documentation, including the supplier Certificate of conformance. We retain the documents for the required document retention periods. Batch codes on Aerospace Fasteners Ltd packaging allows the component to be traced back to its origin.
- All product is verified on receipt by Incoming inspection to assure that all parts are undamaged and conforming to customer requirements. The product is then stored in a secure warehouse.
- If any counterfeit product is suspected to have entered our supply chain, we have processes in place to withdraw the affected products from the customers and quarantine. Aerospace Fasteners Ltd will take appropriate actions with Suppliers and Customers to verify the authenticity of possible counterfeit parts.
- Aerospace Fasteners Ltd make sure that any product that is scrapped cannot be sold again.

Should you have any questions or queries regarding Aerospace Fasteners counterfeit parts policy, please feel free to contact us immediately as these are standards and policies that we as company hold in very high regard.

Many Thanks

Yours Sincerely

Dean Gendall
